Topic: "Developing a Strong GRC to Increase Company Resiliency"

The element of 'speed' in business nowadays becomes more important than ever. This is one of the new dynamics of business which inevitably comes with digital era. In one hand, organizations can increase their ability in making a well-informed decision faster, where on the other hand their customers also demand easier access to services equipped with a faster response time.

This session discusses the challenges faced by organization in digital era in keeping their credit risk exposures within the agreed risk appetite and tolerance, and also strategy to maintain the effectiveness of credit risk management of the organization.

Understand that the company needs to manage its risks effectively whilst operating its business with good governance practices in a highly-regulated sector, PEFINDO Credit Bureau adopts best practice standards for its Governance, Risk management, and Compliance (GRC), and practices them as an integrated GRC discipline. Pefindo Credit Bureau uses its GRC capabilities to support a faster decision making process within organization.

This session discusses practice sharing and lessons to learn from PEFINDO Credit Bureau which heavily relies on IT as its operational backbone in integrating GRC into a single platform of company's governance and management system to support decision making process as well as monitoring on GRC practices throughout the company.
