RISK GOVERNANCE MASTER CLASS

Training & Certification

For Senior Managers and Board Members

Global disruptions have pushed companies across the globe over the technology tipping point. As a result, they are creating a new definition of what is normal and shaping new perceptions of how things should work. They create new sets of threats, regulations, and competition settings while creating new opportunities for global corporations. An effective and integrated practice of Good Corporate Governance and Enterprise Risk Management at the Board level--Risk Governance--is essential in creating and protecting companies' value in this capricious, rapidly-changing world.

Risk Governance Master Class is designed specifically for senior managers and board members in charge of implementing an effective control environment and risk oversight.

The program is focused on providing practical case studies and conceptual learning points that can be applied to a real-world scenario. The curriculum is based on learning by the case method, group work and personal reflection sessions.

The module of Master Class on Enterprise Risk Governance has been originally developed by:

CRMS Global is a non-profit organization that focuses on Risk Management education. Their commitment is to facilitate and encourage the acceleration of risk management practices in Indonesia through knowledge advancement and sharing initiatives.

IN COLLABORATION WITH:

ERMA, a global learning centre for professionals in Enterprise Risk Management, provides a comprehensive set of Enterprise Risk Management courses and certification, and is facilitating collaboration efforts of ERM professionals around the world.

IFC ADVISORY SERVICES ARE SUPPORTED BY: IFC, a member of the World Bank Group, is the largest global development institution focused exclusively on the private sector. Working with private enterprises in about 100 countries, we use our capital, expertise and influence to help eliminate extreme poverty and boost shared prosperity. IFC promotes the adoption of good corporate-governance practices and standards to improve the investment climate.

ENTERPRISE RISK GOVERNANCE

This session will address the underlying principles of Good Corporate Governance, its leading practices across the globe and its integration with risk management accountability discharge at the corporate board and senior management. It also spotlighted the risk governance challenges that all concerned stakeholders, such as investors, regulators, company boards, and minority shareholders groups, have faced in the market.

STRATEGIC RISK MANAGEMENT

Defining the guiding principles for Strategic Risk Management that senior management teams and directors can use to help link Enterprise Risk Management with strategy formulation and execution, enabling them to ensure their strategic risk management is conducted effectively towards creating and protecting value.

LEGAL RISK MANAGEMENT

The world is shrinking. With the rapid rate of technological advancement, business law is globalizing fastest of all. In line with that, the boards and senior management need a greater assurance that legal risks are being appropriately dealt with and the organization remains on target with its performance objectives. Corporate leaders must understand the effective legal risk management framework and practices for that purpose.

RISK LEADERSHIP AND CULTURE

Developing and leading an effective risk culture is the foundation of ERM. A healthy risk culture gives employees a stake in risk management. It starts at the top—with the risk leadership from the board of directors and senior management—and requires commitment and involvement across the entire organization. This session will use case studies exhibiting effective risk culture and leadership in various situations.

FUNDAMENTALS OF ERM

This session will start with reviewing major ERM frameworks widely used, COSO ERM and ISO 31000:2018. Moreover, the discussion would be focused on the principles, framework and process of managing the enterprise-wide risks based on ISO 31000 as the international risk management standard.

CONTROL ENVIRONMENT

A solid and cohesive relationship between risk management and internal control is crucial. This session will provide deep and insightful knowledge about the role of leaders, function, and scope, including risk reporting, which will eventually help to facilitate compliance with the regulatory requirements on internal controls. It will also provide greater assurance for companies to achieve their objectives.

BOARD AUDIT AND RISK OVERSIGHT COMMITTEE: ROLES AND RESPONSIBILITIES

The arising challenges in this post-digitalization era increase the expectations for good audit and risk oversight committees to play a vital role in overseeing management's approach to ERM, including determining the enterprise's risk appetite. This session will address the critical success factors in building high-performing committees and the associated dynamics.

**All sessions are delivered in English.*

RISK BEYOND

Cultivating The Perception: MANAGING IT OR BEING DRIFTED AWAY

It is widely believed that the advancement of technology does not only bring many risks and problems but also gives us opportunities to expand and extend our business. These disruptions have shifted out perceptions, as humans, of how the world works--they are coming in with a lot of moot points along the way, in particular around ethics and the value of humanity itself. This year's topics cover issues and challenges in governance, risk and compliance (GRC) practices incorporating the rise of disruptive technology such as distributed ledger, artificial intelligence, extended reality, and quantum computing (DARQ), and also the urgency of the sustainable development goals (SDGs).

Risk Beyond 2022 is the twelfth International Conference in Enterprise Risk Management presented by ERMA. It is designed to provide risk management practitioners around the world an extensive insight into various GRC issues that organizations face while cultivating shifted perceptions. After battling with the pandemic for 2.5 years, we are back and Risk Beyond 2022 will be held fully onsite in Bali. We need to embrace the new normal in this globalization era. It is time to build our resiliency to bounce back for a better future. With hundreds of leading risk practitioners and decision makers from around the world, Risk Beyond 2022 offers its participants a special opportunity to gain valuable insights on the best practices of Governance, Risk Management, and compliance right from the very source.

Overview

Risk Beyond International Conference on Enterprise Risk Management 2022 will be held on December 8-9, 2022, taking place at the beautiful and luxurious The Anvaya Beach Resort Bali, Indonesia.

The two-day conference will have keynote sessions, panel discussions, breakout sessions, networking breaks, and exhibition booths. For the breakout sessions, each participant is free to choose their most desired sessions. Participants will have the opportunity to delve deep, explore their topic of interest, and participate more actively.

In the Risk Beyond 2022 International Conference, risk professionals would be able to devote two full days in the company of more than 300 national and regional risk management professional peers, within a learning and sharing environment. Thus, it is an excellent place to exchange experiences and knowledge.

Conference Session

With the theme of **"Cultivating the perception: Managing it or being drifted away"**, this program is designed to provide risk management practitioners a comprehensive insight into various issues and challenges that organizations face in this digital era. This event facilitates discussion and knowledge sharing with the speakers and participants from various backgrounds concerning the issues that have been faced by risk management practitioners.

This event introduces a variety of topics such as:

- **The Importance of shifted perceptions in a journey to a sustainable world**
- **Optimizing innovation pathways through GRC**
- **Future of technologies: How DARQ changes ERM Perspectives**
- **Digital transformation pitfalls: Privacy and data protection**
- **Anticipate the technopolar moment: When digital power shapes the global order**
- **Developing e-government: A Vehicle to a good public governance**
- **Blind spots on sustainability promises**
- **Economic Value of peace and prioritizing human rights**
- **Cultivating resilience in the aftermath**

Why Attend?

Risk Beyond 2022 International Conference is the ideal interface for experts and practitioners from business, economics, technology, and other fields to create synergies to govern and manage risk. The program will provide insight on how risk management and risk governance creates stability and continuity of businesses by accommodating discussions through experience sharing on various issues from various perspectives.

Who Should Attend?

Risk Beyond 2022 International Conference is designed to meet the needs of risk professionals from various corporate functions including Board Members, C-level Officers, Directors, Managers, and Heads of Department in Regulatory and Supervisory Authorities, Auditing, Finance, Compliance, IT Auditing, Information Technology, Corporate Governance, Corporate Affairs, and many other corporate functions.
